When a new version of Windows comes out, the old versions of the software stay on the marketplace for a while so that. The most recent Windows 98 update is Build 10049.1. Install Windows 95, 98 or ME in a virtual machine. Related videos: VR 1.20's Installer now supports Vista/7/8 install USB. Download a Windows 10 ISO. Windows 95 I have a Windows 95 (PC) CD on my computer. I'm going to use it on a VM with VMware Player. How can I install windows on this cd? On my usb I can't find the MS-DOS shell (shell.w95). I need to install Windows within the virtual machine. Will VMware Player do the job? I want to install the latest version of Windows 95. I have noticed that the PC didn't boot on the CD. When I tried to start it, it said CD boot failure. Do I need any additional drivers, etc? A: I don't believe you can. I don't believe VMware Player supports Windows 95. You can only run Windows 98 and above on them. When you boot off of the CD, you're not booting off of the CD, you are booting off of the virtual memory of the machine that the CD is on. A: You can convert a Win95 ISO to a bootable USB on any Windows machine, it even supports the latest Win10 and Win8.1. The required software is: Win2iso (also available as a program) Bootice (also available as a program) Steps: Download, install, start the above program. Copy the downloaded ISO, bootice and iso2vmdk. Clone the ISO: cd to your Win95 ISO, select Edit, then choose Clone. Bootice: Start the newly created bootice. From the program, select Boot from open virtual hard disk, select the Win95 CD and start the clone process Bootice will show the new drive and tell you to reboot and press F5. Optional steps: If you are using a non-MSDOS computer, you can use a BIOS Boot Manager to boot from your USB and use the original CD, the BIOS will detect the required drive and tell you what to do.
